

How Laserfiche® Works for Law Enforcement

Manage and Distribute Case Knowledge

- Manage entire case files in a single, secure repository.
- Accelerate the routing and approval of case documents with automated Workflow™ solutions.
- Free up staff time by quickly providing records for investigations and court appearances, subpoenas, FOIA and other public information acts.

Share Intelligence for a Rapid Response

- Distribute information to other agencies while limiting access to confidential records.
- Deliver intelligence to first responders with GIS integration.
- Share access to mission-critical documents and case files through your RMS.
- Accelerate integration with other applications with support for industry-standard Microsoft® SQL Server™ and Oracle® database platforms.

Restrict Access to Confidential Information

- Protect the integrity of criminal investigations with strict control of information access.
- Monitor user activity, including viewing and printing, with Audit Trail™ functionality.
- Redact records to be released in accordance with local, state and federal regulations.
